How to Partner with Us

A Straightforward, Collaborative Process to Accelerate Your MS Research

Our Engagement Process

Engaging with Accelerated Cure Project for MS (ACP) is a simple, four-step unified process, whether you need access to our biosample and data repository, our iConquerMS people-powered research network, or our inclusive engagement resources.

1. INITIAL CONVERSATION

Email our partnerships team with a brief outline of your research needs. We'll schedule an introductory call to learn more about your goals.

2. PROJECT SCOPING & PROPOSAL

During our call, we will discuss your specific needs in detail. Based on this conversation, we will jointly develop a project proposal that includes options for collaboration, a timeline, and a cost estimate.

3. COMMITTEE REVIEW & AGREEMENT

To ensure all projects are people-centric and scientifically valuable, your proposal will be reviewed by the relevant ACP research committee. Once approved, we will execute the necessary agreements, such as a service agreement, material transfer agreement (MTA), or data transfer agreement (DTA).

4. PROJECT LAUNCH

With the agreements in place, we will get started. Our team will work with you to deliver the data, samples, or community insights your project requires.

Our Services & Starting Costs

Pricing depends on project scope, complexity, duration, and specific services required. A detailed estimate will be provided in your project proposal.

Providing access to existing iConquerMS data	From $5,000
Forming and facilitating focus groups or patient councils	From $20,000
Supporting research activities *(e.g., trial management, data collection)*	*Custom pricing (call for details)*
Facilitating inclusive engagement initiatives	*Custom pricing (call for details)*
Collecting new data from iConquerMS members	From $10,000
Collecting biosamples from iConquerMS members	From $125/per sample
Assisting with recruitment for external studies	From $1,500
Disseminating evidence from studies	*Custom pricing (call for details)*

Ready to Accelerate Your Research?
Contact our partnerships team to get started at Partner@AcceleratedCure.org.

Accelerated Cure Project for Multiple Sclerosis (ACP) is a nonprofit founded by a person living with MS, driven by a core belief: research moves faster and has greater impact when the people most affected help shape it. ACP brings together the entire MS community — people affected by MS, researchers, healthcare providers, funders, and partners — in a connected ecosystem built for MS research. That ecosystem includes the ACP Repository, which provides researchers with high-quality biosamples and data; iConquerMS, ACP's people-powered research network; and initiatives that enable more inclusive, equitable, and representative MS research.
